**Minneapolis, MN –July 10, 2013 – IDC-Automatic** a business specializing in, Garage door install and service, has completed the IDEA Commercial Rolling Steel Door & Rolling Steel Fire Door Technician Certification. The material covered in this class is part of a certification process that will promote IDC-Automatic service technicians to *Master Certified Garage Door Technicians*.

This prestigious certification can only be attained by technicians with a minimum of two years work experience and at least 10 fire door drops. This specific certification is step 2 of 4 that are necessary to complete this class, which concludes with a demanding, and comprehensive, 200 question test. All of IDC-Automatic technician's plan to complete the rest of this training process by the end of the year.

### **About (Company)**

Founded in 1974 by Gerald Sizer, Industrial Door Company, Inc. has grown to set the standard for quality garage doors in the Upper Midwest. Beginning in his own garage, Gerry grew the Company through hard work and a commitment to providing outstanding garage door systems and service to customers in the Twin Cities area.

In 1981, Gerry purchased Twin City Spring, renaming it Industrial Spring Company, and began the spring manufacturing division of the Company. With Gerry's guidance, and an expanding customer base, both companies prospered. Gerry semi-retired in the year 2000, with his two children, Jeremy Sizer and Jodi (Sizer) Boldenow, stepping forward and becoming the second generation owners Industrial Door Company and Industrial Spring Company respectively.

### **About IDEA**

The IDEA is a nonprofit educational organization that offers certification and accreditation to door and access-control professionals.
